

Action plan submitted by Ayça Baş for TOKİ ŞEHİT EMRE BOLAT İLKOLULU - 24.12.2022 @ 22:39:49

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › You have differentiated levels of filtering in your school which is an excellent policy. A good policy still needs to be regularly updated - is the system being regularly updated? How often are sites requested to be blocked or unblocked? Periodically evaluate whether it is fit for purpose and involve all stakeholders in this process. In addition, bear in mind that an educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.

Pupil and staff access to technology

- › To have a policy that does not allow staff and pupils to use USB sticks is sensible and cautious but sometimes there are instances when use of USBs/removable media might be acceptable. To ensure that secure systems are maintained to the highest standards, include in your Acceptable Use Policy some information on use of removable storage devices. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

Data protection

- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

IT Management

- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.
- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › When installing new software on school computers, consider providing training and/or guidance in the use of new software that is installed on school computers. This is important to ensure that school members will take advantage of new features, but also that they are aware of relevant security and data protection issues. Remember that not every staff member has the same easy access to technology.

Policy

Acceptable Use Policy (AUP)

- › Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylabel.eu/group/community/school-policy) will provide helpful information.
- › In your school policy issues are regularly discussed. This is good practice as it ensures staff and pupils are aware of them. Do pupils and staff also have to sign related documents to confirm their awareness?
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.

Reporting and Incident-Handling

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the

Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.
- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.
- › Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.
- › It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.

Staff policy

- › There are dangers associated with the use of personal mobile devices in class. Consider why staff would need to use their device and, if appropriate, consider providing a school device. Advise staff to read the fact sheet on Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and ensure that the guidelines to staff are clearly communicated in the School Policy.

Pupil practice/behaviour School presence online

- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

Practice

Management of eSafety

- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.
- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be

someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylevel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- › It is good that sexting has been integrated into wider online safety education across the school. Are you able to assess the impact of this education? Does it help pupils to modify their behaviours? How do you know?
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).
- › It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.
- › It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.
- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.

Extra curricular activities

- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).
- › How do you organise peer mentoring among pupils on eSafety? Check out the resources of the [ENABLE project](#) and share your ideas in the [forum](#) of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.

Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetylevel.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.

Staff training

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can

upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
